Saturday Concurrent Breakout Sessions

Coaching Track:

1. Michael Malone—**Seminar 1: Raise Your consciousness with Transpersonal Life Coaching.** In this lively and interactive presentation, you will explore both the fundamentals of Transpersonal Life Coaching and advanced applications to expand consciousness. We will discuss ways of using Heart-Centered Hypnotherapy methods in a coaching context, and other methods to raise consciousness in both coach and client.
2. Judi Vitale—**Seminar 2.: Getting "Out There" - Marketing Your Transpersonal Coaching Practice.** Transpersonal Coaching is a unique service that appeals to more people than you might think. Learn how to define and find your ideal clients, build your business and do your heart's work: bringing increasing numbers of loving souls into higher states of wakefulness!
3. Tom Gigliotti—**Seminar 3.. Transcending Therapy: The Therapist as Coach..** This program will teach the value of identifying how to terminate psychotherapy and continue to work with clients when coaching is more relevant. Many clients especially in later life transitions are looking to better understand their purpose in life and need to, as Rainer Maria Rilke said, “live from a deep place.” Therapists are often some of the first to hear this in clients’ life stories and can be of great benefit using a coaching model to align clients with their life purpose.

Kellie Kirksey—**The Magic of TRIM-LIFE at Cleveland Clinic.** Come join us as we share our TRIM-LIFE story with you. This presentation will give you the history of how TRIM-LIFE began at the Cleveland Clinic Center for Integrative Medicine under the guidance of Dr. Tanya I. Edwards, MD. Participants will discover the nuances that differentiate our hospital-based program from the original TRIM-LIFE.

Cara Stiles—**Jung and DID: The Interface of Carl Jung and Dissociative Identity Disorder: From Autonomous Complex to Alter Personality.** The creation of an alter personality in DID or an autonomous complex, as first described by Carl Jung, has a similar etiology. Both emerge as a defensive structure of the psyche in response to childhood trauma. The differentiation between alter and complex is less defined than one might feel comfortable acknowledging. We explore the similarities and differences.

Laurie Rose—**The Magic of Clean Language to Enhance Empty Chair Clearings..** Learn to combine the power of empty chair clearings with the magic of Clean Language to quickly embody and anchor resources.

Laura Purnell & Karen Miraldi—**The Integrated Performance Model: Introducing *Energy & Matters of the Heart*** - This presentation is the story of how two healing practitioners—an educator and former urban school superintendent and an artist-life coach and former attorney—are generating momentum for engagement in heart-centered therapies and practices in their communities, influenced by on-going work at Heartmath, and by Dr. Alan Watkins

Laura Imbornoni—**Expressive Movement Therapy: Bridge between Body, Mind, Spirit.** We will explore the connection of body/mind/spirit with stillness and simple movement, which can be done in chairs or standing. We’ll explore authentic expression of feelings through movement, posture, and sound, using powerful world music and community as support.

Carol Lampman—**Breath Is Life: Understanding the Messages of your Breath** The breath affects or is affected by practically everything in life. When the body is holding energetically, the breath becomes distorted or dysfunctional. This holding is a direct reflection of unresolved past trauma and can be used as a diagnostic tool. The ability to detect and understand these messages provides immediate insight for the trained professional.
